

Humbucker 3 conductor wiring

All Gemini 3 conductor humbuckers

Wiring for any 3 conductor humbucker pickup using one toggle or push pull switch (on-on)

The switch outputs are from the middle terminals.

In the up position, the top terminals will be connected to the middle terminals.

In the down position, the bottom terminals will be connected to the middle terminals.

The Red lead is connected directly to live, not using the switch.

The switch output is connected to earth.

Two pickups can be switched together, using both sides of a 2 pole (DPDT) switch.
